

Mohit Sharma

PERSONAL DATA

ADDRESS: 117 Pleasant St SE, Room 452, Minneapolis, MN 55455, USA
PHONE: +1 631 353 9519
EMAIL: sharm163@umn.edu, mohit4u1 (at) gmail

EDUCATION

CURRENT	Ph.D. Candidate in COMPUTER SCIENCE, University of Minnesota , Minneapolis Thesis topic: "Preference modeling and accuracy in recommender systems." Advisor: Prof. George KARYPIS. Thesis committee: Prof. George KARYPIS, Prof. Joseph KONSTAN, Prof. Zizhuo WANG & Prof. Rui KUANG. GPA: 3.9/4.0
2012-2016	Masters Degree in COMPUTER SCIENCE, University of Minnesota , Minneapolis Coursework: Machine Learning, Data Mining, Artificial Intelligence, Convex Optimization, Bayesian Decision Theory, Matrix Theory, Algorithmic techniques for Big Data, Parallel Computing. GPA: 3.9/4.0
JUNE 2009	Bachelor of Engineering in INFORMATION TECHNOLOGY, Delhi College of Engineering , Delhi

WORK EXPERIENCE

CURRENT	Graduate Research Assistant at UNIVERSITY OF MINNESOTA, MN Research towards Ph.D. thesis.
JUNE-NOV 2014	Research Intern at SAMSUNG RESEARCH AMERICA, CA <i>Recommender Systems</i> Developed large scale <i>recommender system</i> for Smart TV using SPARK, HADOOP. Designed algorithms for item cold-start Top- <i>n</i> recommendations.
SUMMER 2013	Research Intern at TECHNICOLOR LABS, Palo Alto, CA Developed a web-based prototype (<i>Python, MongoDB</i>) to learn users' preferences in <i>recommender systems</i> using <i>multi-arm bandit</i> algorithms.
JULY 2009 - DEC 2011	Software Development Engineer at CITRIX R&D INDIA PRIVATE LIMITED, Bangalore Worked on development of <i>Citrix Receiver</i> app for <i>Blackberry, Android</i> and <i>HTML5</i> platforms (<i>Java, Javascript</i>).
JAN 2009 - MAR 2009	Engineering Intern at HI-TECH ROBOTICS SYSTEMZ LTD, India Developed a <i>p2p</i> communication api in C++ using NAT traversal techniques for exchanging messages between nodes or bots via internet.
SUMMER 2008 DEC 2007 - FEB 2008	Engineering Intern at GOOGLE INDIA PRIVATE LIMITED, India Developed a web-based Workflow Management tool hosted internally on <i>Google AppEngine</i> (<i>Python</i>). Developed initial version of tool using <i>PHP, MySQL</i> and <i>Javascript</i> .

PROGRAM COMMITTEE / AWARDS

Program committee: International Workshop on Machine Learning Methods for Recommender Systems, SDM (2015, 2017).

Travel awards: SDM 2015.

PROJECTS

Recommender System with Implicit Feedback using Low-Rank Matrix Factorization: Used implicit feedback with low rank matrix factorization technique to improve recommendations in massively multiplayer online games.

Using sparse inverse covariance estimation for Top-n recommender systems: Applied sparse inverse covariance estimation (GLASSO) to learn item-item similarities for Top-n recommendations.

Matrix completion using crowdsourcing: Learn missing values in ratings matrix using crowdsourcing and evaluate recommendation results.

Optimization techniques for routing in dynamic networks: Implemented Alternating Direction Method of Multipliers (ADMM) to minimize flow costs to obtain the best path in routing.

Comparison of draft assemblies of Chinese Hamster genome and Chinese Hamster Ovary: Devised methods of comparing two assemblies as no standard method of comparison is available and found the consensus regions between the two large genome datasets.

OTHERS

BandBaaja app: Wrote and released “Band Baaja” a location aware android app to discover music events across major Indian cities. Server side written in python and hosted on Google’s AppEngine platform.

Programming languages: C/C++, Python, Scala, Java
